

PRESS RELEASE 01/01/09

WasteIndustryTraining.com

"The Industry's Educator"

EIA has invited WasteIndustryTraining.com to give a presentation at [WASTE EXPO 2009](#). It is scheduled for **Monday June 8th, 2009 from 1:45pm—3:00pm** and comes under the heading of "Labor and Employment". The subject will be [Differing Perspectives on Employee Training—What Role Should Technology Have in Your Program](#) located under "Labor and Employment".

Roger Nessly, Marketing & Sales for Waste Industry Training stated "We are thrilled to be a part of the upcoming show. Word of mouth regarding this innovative way of training is spreading rapidly. Everywhere we've introduced WIT; we've been met with very positive responses and excitement. With current economic conditions, many hauling companies and manufacturers are reducing travel and training budgets. The option of a cost effective web-based and interactive training vehicle that includes test results reporting is very timely"

Good employee training programs often include electronic and web-based techniques as well as more traditional methods. Waste industry educators will discuss when to use these methods and how to integrate them into a successful program at your facility.

About Waste Industry Training:

WasteIndustryTraining.com (WIT) believes an educated workforce creates a safer and more productive work environment while elevating morale. Our staff and consultants have experience on all fronts including safety, operations, manufacturing, sales, and hauling within the waste industry. We have observed an overwhelming need for training and the documentation thereof, for your employee files. Hence, WasteIndustryTraining.com (WIT) was born in 2006, providing a wide variety of online waste industry training courses available to all of your employees including office staff, drivers, maintenance personnel, and management. WIT can provide custom courses communicating your corporate philosophies and goals.

One of our main goals is to ensure your employees get the proper training to enable them to perform their duties in the safest and most efficient manner while giving them the tools they need to advance within your organization.

The knowledge of the waste industry, concern for safety, and maintaining high ethics are the foundation of this company.
